ISTE-722 Database Connectivity and Access
Practice Exercise 9 – Backup

Assignment Purpose: Begin to write a backup routine.

NOTE: This will not be part of your database class file.

1. Investigate MySQL to learn about how it stores information about tables and columns.
2. Use the travel database for this assignment.
3. Write code to display a list of table names to the user and allow them to pick one.
4. Then generate and display the CREATE TABLE statement for the chosen table.
